Education

Florida International University — Miami, FL
Bachelor of Science in Computer Science, GPA: 3.76 — *Jan. 2025 – Apr. 2027*

Miami Dade College — Miami, FL
Associate of Arts in Computer Science, GPA: 3.81 — *June 2023 – Dec. 2024*

- Awards/Honors: ColorStack Vice President at FIU, INIT Exec Board, CodeIn MDC Founder, MLT Fellow, CodePath E3 Program, SharkByte Hackathon Web Lead, Google Developer Group Vice President at FIU
- Relevant Coursework: C++ Programming, Java Programming 2, Discrete Mathematics, Statistical Methods, Data Structures & Algorithms, Programming Languages, Systems Programming, Computer Architecture, Deep Learning, Blockchain Technology

Experience

Software Engineer Intern — May 2025 – Aug. 2025
NVIDIA — *Santa Clara, CA*

- Collaborated on internal web dev projects across 14+ NGC repos using Next.js, TypeScript, and Tailwind
- Developed a pre-staging 'dev' environment for local and CI/CD use within NGC
- Integrated Flox across our frontend NGC repos for predictable and simplified local runtime setups
- Worked closely with infrastructure and backend teams to meet frontend goals, fix issues, and discuss features

CodePath Tech Fellow — May 2024 – Present
CodePath — *Miami, FL*

- Completed 30 weeks of intensive team-based training in DSA & Full-Stack web development
- Led peer sessions and provided technical mentorship to students on DSA concepts
- Led a team of 3 in creating a Full-Stack app, Errorly, using GitHub Issues and branches

Advanced Web Dev Team Member — Oct. 2024 – Dec. 2024
INIT Build Program — *Miami, FL*

- Collaborated with a team of 4 Web Developers to create a Full-Stack app, Ducky Pics, in 9 weeks
- Implemented authentication with Google OAuth and email code verification
- Built frontend components and secure backend routes with error handling in FastAPI

Projects

Poker Robot | *Next.js, TypeScript, Flask*, Arduino, CAD, CV — 2026

- Designed and developed a custom poker robot capable of shuffling, rigging, and dealing cards
- Used an NVIDIA Jetson Orin Nano as a server for our frontend and arduino serial communication
- Made use of computer vision for rigged card shuffling and player card dealing features

Multiplayer Web Poker | *Next.js, TypeScript, Tailwind CSS, Node.js, Websockets* — 2026

- Used public sprite sheets, custom svg designs, and fully responsive UI for web poker game
- Used Node.js for backend web API and websockets for live game actions, chat, and rooms

Cozy Soul Rental Site | *Next.js, Resend, TypeScript, Tailwind CSS, Google Maps API* — 2025

- Developed an Airbnb-like home rental site with admin panel and location-based listings
- Built multi-step forms and integrated Google Maps API for location selection
- Used Google OAuth, JWT, and HTTP-only cookies for secure auth
- Created Chrome extension to scrape Airbnb SVG icons for the UI

Theoretical Stock Plays | *Polygon.io Stock API, Next.js, TypeScript* — 2024

- Built tool to simulate stock plays based on user-defined actions
- Used Polygon.io API for live price data and stock chart display

Practical Synth Theme | *VS Code Extension* — 2024

- Custom VS Code theme with 2000+ installs on the Marketplace

General Planner | *MERN Stack, Redux, HTML5, CSS3* — 2023

- Developed and deployed a Full-Stack planner with RESTful API and CRUD support
- Used MVC architecture for maintainable code
- Implemented auth routes and role-based access control

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C++, SQL
Frameworks: Next.js, React.js, Express.js, Node.js, FastAPI, Java Spring Boot
Libraries: Tailwind CSS, Bootstrap, Shadcn, jQuery, Redux, Zustand, Prisma
Databases & Storage: PostgreSQL, MongoDB, Redis, Supabase, Railway, AWS S3
DevOps & Cloud: Docker, Kubernetes, GitLab CI/CD, Terraform, IaC, IaaS, AWS, GCP
Testing & Tools: Postman, PlayWright, Jest, SonarQube, Git, GitHub, VS Code, Figma
